Dear Colleagues,

Early this morning, we announced that Roche intends to acquire the outstanding shares of Spark Therapeutics for \$114.50 per share or \$4.8 billion. Roche's offer is a testament to the value we have created and to our shared vision for a world where no life is limited by genetic disease. See the press release here: <http://ir.sparktx.com/news-releases/news-release-details/spark-therapeutics-enters-definitive-merger-agreement-roche>.

We expect this transaction to close in the second quarter, subject to the customary conditions and regulatory approvals. During this time, we will continue normal business activities and it's important that you continue to stay focused on our mission of discovering, developing, and delivering treatments in ways unimaginable.

We realize that this may be a time of potential uncertainty and that you likely have many questions. You will see an invitation from Communications for an all-employee meeting at 9:15am ET today (Monday, Feb. 25) so we can share the information we have at this time. Additionally, we are hosting a meeting for the senior leadership team (SLT) from 8:30-9:15am to discuss this transaction. Recognizing that a substantial number of our colleagues are traveling, including for our planning meeting for LUXTURNA® (voretigene neparvec), we plan to repeat the content of the all-employee meeting for these colleagues.

Our steadfast progress and success to date have enabled us to build unmatched competencies in the discovery, development and delivery of genetic medicines. The needs of patients and families living with genetic diseases continue to be immediate and vast. Together with Roche's worldwide reach and extensive resources, we believe we can accelerate the development of more gene therapies for more patients affected by new diseases and further expedite our vision of a world where no life is limited by genetic disease while reinforcing Philadelphia's position as the center of gene therapy innovation. We expect Roche's focus post-close will be to support investment in our innovative spirit and ensure our continued progress in breaking barriers and advancing care for patients.

In the near term, it is important we remain focused on the business at hand. Together, our determination and commitment has impacted the lives of many patients and has helped create the path for gene therapies for genetic diseases. That all-important work is not done today, and I'm excited to continue to create the path as a Roche Group company to accelerate the impact we can deliver to patients and families.

Sincerely,
Jeff
